- Programmer
- Accessible Technology I

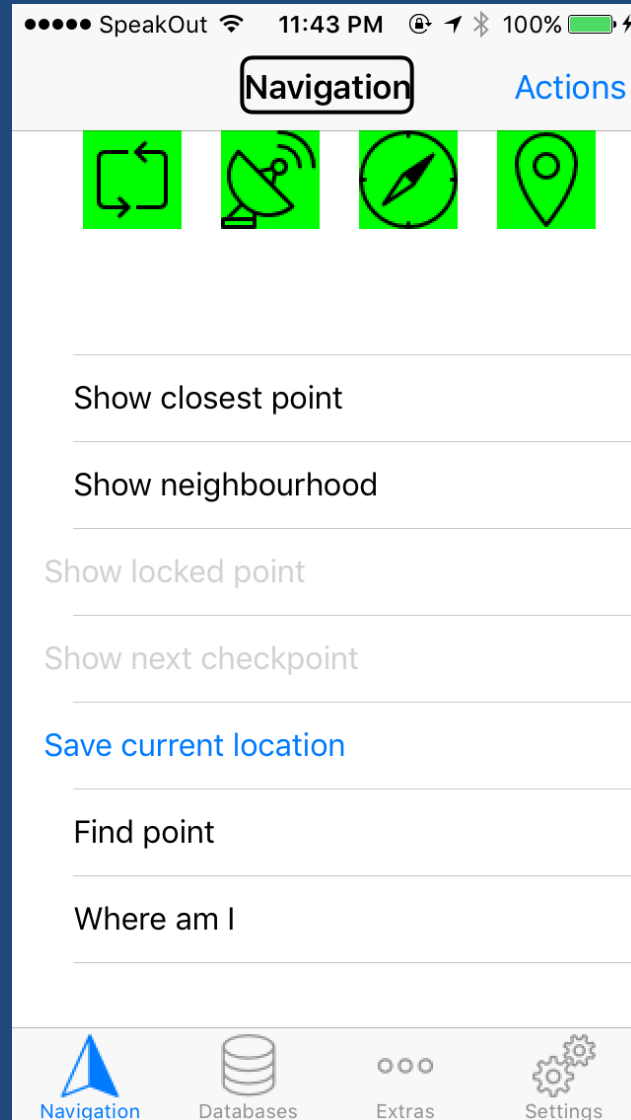

The Loadstone Story

- Originally designed for Nokia phones using the Symbian Series60 platform
- The first truly portable GPS for blind pedestrians
- 7,000 users worldwide
- A unique international collaboration of users, testers, translators and developers
- Designed by the blind, for the blind

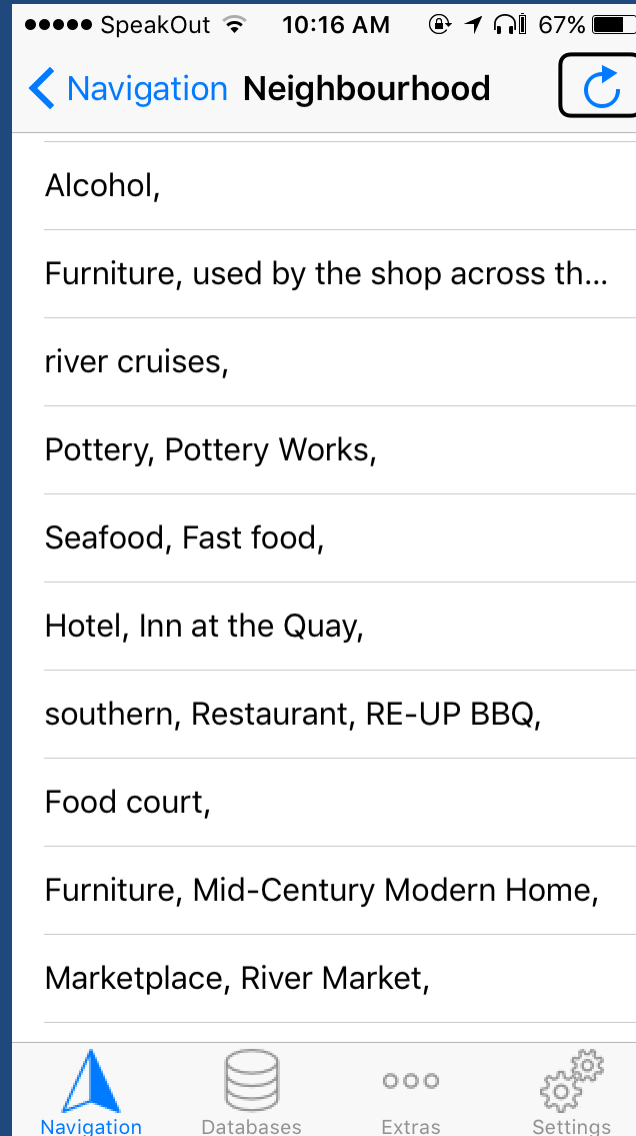

Features of Loadstone GPS for IOS

- Designed with users of voiceover in mind
- No data plan required for major functions
- Available in multiple languages
- Highly customizable and configurable
- Access to worldwide map data from public mapping sources
- Ability to import files from previous Loadstone versions
